

# EUROSTONE QUARTZ

## LEED DOCUMENTATION

### Environmental Product Declaration

EuroStone Quartz surfaces contribute to LEED certification through multiple credit categories. Our commitment to sustainable manufacturing and eco-friendly formulations makes our products an excellent choice for green building projects.

### LEED v4.1 Credits

#### MR Credit: Building Product Disclosure and Optimization

- Environmental Product Declarations (EPD) available
- Third-party verified environmental impact data
- Transparency in material composition and manufacturing processes
- Health Product Declarations (HPD) compliant

#### MR Credit: Recycled Content

- Recycled content varies by color (30%-100% post-industrial recycled glass)
- Eco-Stone Collection: Higher recycled content formulations
- Cosmolite Collection: Up to 100% post-industrial recycled materials
- Diverted waste from landfills through responsible sourcing

#### EQ Credit: Low-Emitting Materials

- GREENGUARD Gold Certified for indoor air quality
- Low VOC emissions tested per CDPH Standard Method v1.2
- NSF/ANSI 51 Certified for food contact surfaces
- Contributes to healthy indoor environments

#### MR Credit: Regional Materials

- Manufactured in Italy with European sourced materials
- Available through regional distribution centers in the United States
- California headquarters: Los Angeles (310-967-0077)

### Additional Sustainable Features

- Low quartz formulations reduce crystalline quartz exposure
- Energy-efficient manufacturing processes
- Durable, long-lasting surfaces reduce replacement frequency
- Non-porous surface requires no chemical sealants
- Recyclable at end of product life
- Made in Italy with strict environmental standards
